Course Overview

Every time you check email, log into a cloud app, or perform any number of job tasks using technology, you're a potential target for cyber threats—and a critical line of defense. This course empowers everyday technology users like you with the awareness and habits needed to protect yourself and your organization from these threats. You'll learn how to recognize threats, avoid common traps, and use today's digital tools—including artificial intelligence (AI)—more safely. Whether you're in the office, at home, or on the move, you'll walk away from this course with the confidence to use technology more securely. And, you'll have the knowledge and skills to contribute to a strong culture of cybersecurity wherever you work.

About This Course

Every time you check email, log into a cloud app, or perform any number of job tasks using technology, you're a potential target for cyber threats—and a critical line of defense. This course empowers everyday technology users like you with the awareness and habits needed to protect yourself and your organization from these threats. You'll learn how to recognize threats, avoid common traps, and use today's digital tools—including artificial intelligence (AI)—more safely. Whether you're in the office, at home, or on the move, you'll walk away from this course with the confidence to use technology more securely. And, you'll have the knowledge and skills to contribute to a strong culture of cybersecurity wherever you work.

Who Should Attend

This course is designed for all users of computers, mobile devices, networks, and the Internet, to enable them to use technology more securely and minimize digital risks, regardless of technical ability.
