Course Overview

AIX System Administration - Part I Course Overview

This IBM AIX System Administration training course is designed to give delegates practical experience in the administration of an AIX System. Reference will be made to the AIX commands required to administer the system, although practical work, where applicable, will concentrate on using the System Management Interface Tool (SMIT) to achieve the course objectives.

Similarly, the course is targeted to closely follow the official IBM AIX curriculum for certification.

Although the course is based on AIX Version 7.1 it is also appropriate for prior releases of AIX.

Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.
