Delivery Format: Instructor Led - Online

Certification: Certified Agile Service Manager®

Course Overview

This course provides an introduction to Agile Service Management, the application, and integration of agile thinking into service management processes and process design projects. Agile thinking improves IT's effectiveness and efficiency and enables IT to continue to deliver value in the face of changing requirements. This course prepares you for the Certified Agile Service Manager (CASM) certification.

About This Course

This course provides an introduction to Agile Service Management, the application, and integration of agile thinking into service management processes and process design projects. Agile thinking improves IT's effectiveness and efficiency and enables IT to continue to deliver value in the face of changing requirements. This course prepares you for the Certified Agile Service Manager (CASM) certification.

Who Should Attend

The target audience for the CASM course is

Anyone interested in learning about Agile and Scrum from a products and process perspective

Process owners and process designers

Developers who are interested in helping make processes more agile

Managers who are looking to bridge multiple practices into a DevOps environment

Employees and managers responsible for designing, re-engineering or improving process

Consultants guiding their clients through process improvement and DevOps initiatives

Internal and external suppliers Process stakeholders

Learning Outcomes

Upon successful completion of this course, participants will be able to:

The learning objectives for Certified Agile Service Manager (CASM) include an understanding of:

What does it mean to “be agile”

The Agile Manifesto, its core values, and principles

Agile concepts and practices including ITSM, Kanban, Lean and DevOps

Learn about SCRUM from a product and process perspective

Agile thinking and values into service management

Scrum roles, artifacts, and events as it applies to both products and processes

The two aspects of Agile Service Management:

Agile Process Improvement—ensuring processes are lean and deliver “just enough” control

Agile Process Design—applying Agile practices to process design projects
