

Cisco Protecting Against Malware Threats with Cisco AMP for Endpoints (SSFAMP) v6.0

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Classroom

Course Overview

Protecting Against Malware Threats with Cisco AMP for Endpoints (SSFAMP) v6.0 is a 3-day course that shows you how to deploy and use Cisco® AMP for Endpoints, a next-generation endpoint security solution that prevents, detects, and responds to advanced threats. Through expert instruction and hands-on lab exercises, you will learn how to implement and use this powerful solution through a number of step-by-step attack scenarios. You will learn how to build and manage a Cisco AMP for Endpoints deployment, create policies for endpoint groups, and deploy connectors. You will also analyze malware detections using the tools available in the AMP for Endpoints console, Cisco Threat Grid, and the Cisco Orbital Advanced Search Tool. The course qualifies for 24 Cisco Continuing Education credits (CE) towards recertification. This class will help you: Learn how to deploy and manage Cisco AMP for Endpoints Succeed in today's high-demand security operations roles

About This Course

Protecting Against Malware Threats with Cisco AMP for Endpoints (SSFAMP) v6.0 is a 3-day course that shows you how to deploy and use Cisco® AMP for Endpoints, a next-generation endpoint security solution that prevents, detects, and responds to advanced threats. Through expert instruction and hands-on lab exercises, you will learn how to implement and use this powerful solution through a number of step-by-step attack scenarios. You will learn how to build and manage a Cisco AMP for Endpoints deployment, create policies for endpoint groups, and deploy connectors. You will also analyze malware detections using the tools available in the AMP for Endpoints console, Cisco Threat Grid, and the Cisco Orbital Advanced Search Tool. The course qualifies for 24 Cisco Continuing Education credits (CE) towards recertification. This class will help you:

- Learn how to deploy and manage Cisco AMP for Endpoints
- Succeed in today's high-demand security operations roles

Who Should Attend

The primary audience for this course is as follows:

Cisco integrators, resellers, and partners

Network administrators

Security administrators

Security consultants

Systems engineers

Technical support personnel

Learning Outcomes

Upon successful completion of this course, participants will be able to:

After taking this course, you should be able to:

Cisco Advanced Malware Protection (AMP)

Recognize the key features and concepts of the AMP for Endpoints product

Navigate the AMP for Endpoints console interface and perform first-use setup tasks

Identify and use the primary analysis features of AMP for Endpoints

Use the AMP for Endpoints tools to analyze a compromised host

Analyze files and events by using the AMP for Endpoints console and be able to produce threat reports

Configure and customize AMP for Endpoints to perform malware detection

Create and configure a policy for AMP-protected endpoints

Plan, deploy, and troubleshoot an AMP for Endpoints installation

Use Cisco Orbital to pull query data from installed AMP for Endpoints connectors.

Describe the AMP Representational State Transfer (REST) API and the fundamentals of its use

Describe all the features of the Accounts menu for both public and private cloud installations

Additional Course Details

Nexus Humans Cisco Protecting Against Malware Threats with Cisco AMP for Endpoints (SSFAMP) v6.0 training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the Cisco Protecting Against Malware Threats with Cisco AMP for Endpoints (SSFAMP) v6.0 course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.
