

Data Analysis and Visualization with Microsoft Excel

Category: Data & Analytics | **Vendor:** Microsoft Apps

Duration: 16.00 hours (2 days)

13.0 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Language: English

Delivery Format: Instructor Led - Online

Course Overview

Organizations that rely on instinct often miss key opportunities. The ones that trust their data? They win more customers, keep them longer, and earn more in the process. In fact, data-driven organizations are 23 times more likely to acquire customers, six times more likely to retain them, and 19 times more likely to be profitable.

This course shows you how to use Microsoft Excel to make sense of data and communicate it clearly. You'll learn how to organize, clean, and analyze datasets, build dashboards that update with a click, and present insights using tools like PivotTables, Power Pivot, and geospatial charts. For professionals responsible for reporting, forecasting, or decision support, this training delivers practical, real-world skills you can apply right away.

About This Course

Organizations that rely on instinct often miss key opportunities. The ones that trust their data? They win more customers, keep them longer, and earn more in the process. In fact, data-driven organizations are 23 times more likely to acquire customers, six times more likely to retain them, and 19 times more likely to be profitable.

This course shows you how to use Microsoft Excel to make sense of data and communicate it clearly. You'll learn how to organize, clean, and analyze datasets, build dashboards that update with a click, and present insights using tools like PivotTables, Power Pivot, and geospatial charts. For professionals responsible for reporting, forecasting, or decision support, this training delivers practical, real-world skills you can apply right away.

Who Should Attend

This course is designed for students who already have foundational knowledge and skills in Excel and who wish to perform robust and advanced data and statistical analysis with Microsoft Excel using PivotTables, use tools such as Power Pivot and the Data Analysis ToolPak to analyze data, and visualize data and insights using advanced visualizations in charts and dashboards in Excel. To ensure success, you should have baseline skill using Microsoft Excel worksheets, particularly in creating workbooks with formulas and function

Prerequisites & Entry Requirements

General Prerequisites:

Excel - Part 1 & 2 or equivalent experience

Learning Outcomes

Upon successful completion of this course, participants will be able to:

This course gives you the tools to move beyond rows and columns and start driving decisions with data. You'll build confidence using Excel to solve real business problems—turning raw data into insight, and insight into action. Clean and prepare data using tables, formulas, and functions Analyze trends and patterns with PivotTables and PivotCharts Build interactive dashboards with slicers and timelines Use geospatial and statistical tools to deepen your analysis Model data using Power Pivot and connect multiple sources

Additional Course Details

Nexus Humans, Data Analysis and Visualization with Microsoft Excel training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the ITS Data Analytics course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.
