Certification: Microsoft Certified: Fabric Analytics Engineer Associate

Course Overview

This Microsoft Fabric Analytics Engineer (DP-600) course covers methods and practices for implementing and managing enterprise-scale data analytics solutions using Microsoft Fabric. Students will build on existing analytics experience and will learn how to use Microsoft Fabric components, including lakehouses, data warehouses, notebooks, dataflows, data pipelines, and semantic models, to create and deploy analytics assets.

About This Course

This course covers methods and practices for implementing and managing enterprise-scale data analytics solutions using Microsoft Fabric. Students will build on existing analytics experience and will learn how to use Microsoft Fabric components, including lakehouses, data warehouses, notebooks, dataflows, data pipelines, and semantic models, to create and deploy analytics assets.

This course is best suited for those who have the PL-300 certification or similar expertise in using Power BI for data transformation, modeling, visualization, and sharing. Also, learners should have prior experience in building and deploying data analytics solutions at the enterprise level.

Who Should Attend

The primary audience for this course is data professionals with experience in data modeling, extraction, and analytics. DP-600 is designed for professionals who want to use Microsoft Fabric to create and deploy enterprise-scale data analytics solutions.

Prerequisites & Entry Requirements

General Prerequisites:

While there are no required prerequisites for taking this course, it is recommended that students have:

A foundational knowledge of core data concepts and how they're implemented using Microsoft data services (see: Microsoft Azure AI Fundamentals Training (AI-900))

Experience designing and building scalable data models, cleaning and transforming data, and enabling advanced analytic capabilities that provide meaningful business value using Microsoft Power BI (see: Design and Manage Analytics Solutions Using Power BI (PL-300))
