

Introduction to HTML5, CSS3 and JavaScript (TT4003)

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Introduction to HTML5, CSS3 & JavaScript is geared for developers who need to understand the latest web technologies and responsive design practices central to targeting the entire spectrum of user platforms and browsers. This jumpstart style course provides a balanced mixture of theory and practical labs designed to take students through HTML5, CSS3 and JavaScript. Students who attend this course will leave this course armed with the new skills to begin to design, implement, and deploy robust, flexible, and safe web applications

About This Course

Introduction to HTML5, CSS3 & JavaScript is geared for developers who need to understand the latest web technologies and responsive design practices central to targeting the entire spectrum of user platforms and browsers. This jumpstart style course provides a balanced mixture of theory and practical labs designed to take students through HTML5, CSS3 and JavaScript. Students who attend this course will leave this course armed with the new skills to begin to design, implement, and deploy robust, flexible, and safe web applications

Who Should Attend

This is an introductory level course, designed for web developers that need to upgrade core skills leveraging modern scripting and web development languages and standards. This course provides an excellent foundation for continued learning to gain in-demand skills in in-demand skills and technologies such as Angular, React, NodeJS, JQuery and more. This course can also be tuned for non-developers. Please inquire for details.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

This 'skills-focused' course is approximately 50% hands-on, combining expert lecture, real-world demonstrations and group discussions with machine-based practical labs and exercises. Our instructors are highly experienced practitioners who bring years of current 'on-the-job' experience into every classroom. Working within in a hands-on learning environment guided by our expert team, attendees will explore:

HTML5:
How to effectively meet requirements using the full range of HTML5 semantic and structural elements
To work with technologies such as web storage, application caching, and cross-domain messaging to improve performance and the user experience

CSS:
What features CSS3 supports and how they can be effectively used with HTML5 and other technologies
To adapt to varying degrees of browser support for HTML5 and CSS3

JavaScript:
What JavaScript is, how it relates to other programming languages, and how to script your web pages with it
To traverse and manipulate the DOM and handle events in ways that work in all browsers
To work with closures and prototypes and other exotic features of JavaScript

Debugging
What is needed to effectively debug these web technologies
How to use both browser-based and proxy-based debuggers and tools
