

JBoss Application Server Administration

Category: Developer

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

JBoss Application Server Administration Course Overview

This JBoss Application Server Administration course teaches the core skills needed to install and manage the JBoss Application Server up to WildFly version 21, equivalent to JBoss EAP version 7.3. As well as configuring the JBoss Application Server, this hands-on course shows delegates how to deploy and monitor Java Enterprise Edition and web applications. Delegates will also configure various JBoss subsystems such as logging, data sources and messaging, and investigate tuning and high availability concepts such as clustering and load balancing.

Similarly, the course is targeted to closely follow the official Red Hat JBoss curriculum for certification. Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.

About This Course

JBoss Application Server Administration Course Overview

This JBoss Application Server Administration course teaches the core skills needed to install and manage the JBoss Application Server up to WildFly version 21, equivalent to JBoss EAP version 7.3.

As well as configuring the JBoss Application Server, this hands-on course shows delegates how to deploy and monitor Java Enterprise Edition and web applications. Delegates will also configure various JBoss subsystems such as logging, data sources and messaging, and investigate tuning and high availability concepts such as clustering and load balancing.

Similarly, the course is targeted to closely follow the official Red Hat JBoss curriculum for certification. Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.

Prerequisites & Entry Requirements

General Prerequisites:

Requirements

Good operating system knowledge similar to the level covered on our Linux Introduction course or an equivalent Windows course is required. Whilst no prior knowledge of JBoss is required, delegates should be from a relevant technical background. Some awareness of internet architectures and protocols is assumed.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Course Objectives

To provide the skills necessary to install, configure, manage, deploy applications to and understand the core aspects of JBoss Application Server.

Additional Course Details

Nexus Humans, JBoss Application Server Administration training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the ITS Data Analytics course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.
