

VMware NSX for Intrinsic Security [V4.x]

Category: Security

Duration: 40.00 hours (5 days)

32.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Other

Course Overview

This five-day, hands-on training course provides you with the knowledge, skills, and tools to achieve competency in configuring, operating, and troubleshooting VMware NSX® for intrinsic security. This course introduces all the security features in NSX, including Distributed Firewall and Gateway Firewall, Intrusion Detection and Prevention (IDS/IPS), NSX Application Platform, NSX Malware Prevention, VMware NSX® Intelligence , and VMware NSX® NDR . In addition, this course presents common configuration issues and gives a methodology to resolve them.

About This Course

This five-day, hands-on training course provides you with the knowledge, skills, and tools to achieve competency in configuring, operating, and troubleshooting VMware NSX® for intrinsic security. This course introduces all the security features in NSX, including Distributed Firewall and Gateway Firewall, Intrusion Detection and Prevention (IDS/IPS), NSX Application Platform, NSX Malware Prevention, VMware NSX® Intelligence , and VMware NSX® NDR . In addition, this course presents common configuration issues and gives a methodology to resolve them.

Who Should Attend

Experienced security administrators

Learning Outcomes

Upon successful completion of this course, participants will be able to:

By the end of the course, you should be able to meet the following objectives:

Define the concepts related to information security

Explain the different types of firewalls and their use cases

Describe the operation of intrusion detection and intrusion prevention systems

Differentiate between Malware Prevention approaches

Describe the VMware intrinsic security portfolio

Use NSX segmentation to implement Zero-Trust Security

Configure user and role management

Configure and troubleshoot Distributed Firewall, Identity Firewall, and time-based policies

Configure and troubleshoot Gateway Security

Use VMware Aria Operations™ for Logs and VMware Aria Operations™ for Networks to operate NSX firewalls

Explain the security best practices related to grouping, tagging, and rule configuration

Describe north-south and east-west service insertion

Describe endpoint protection

Configure and troubleshoot IDS/IPS

Deploy NSX Application Platform

Configure and troubleshoot NSX Malware Prevention

Describe the capabilities of NSX Intelligence and NSX NDR

Additional Course Details

Nexus Humans VMware NSX for Intrinsic Security [V4.x] training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the VMware NSX for Intrinsic Security [V4.x] course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.

Frequently Asked Questions
