

VMware Workspace ONE: Deploy and Manage [V22.x]

Duration: 40.00 hours (5 days)

32.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Other

Course Overview

In this five-day course, you learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform, endpoint management solution with VMware Workspace ONE® UEM. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint life cycle. After the course, you will have the foundational knowledge for effectively implementing Workspace ONE UEM. Also, you learn how to apply the fundamental techniques for integrating VMware Workspace ONE® Access with Workspace ONE UEM to securely distribute business-critical applications from any device and to configure access management controls. Through a combination of hands-on labs, simulations, and interactive lectures, you configure Workspace ONE Access and Workspace ONE UEM system and productivity integrations. You will leave with a foundational understanding of how Workspace ONE uses various authentication methods and protocols to determine user access permissions and enable single sign-on. Overall, the course lays out the foundational principles of identity and access management. Please note - This course is a combination of the VMware Workspace ONE: Skills for UEM and the VMware Workspace ONE: Integrations course.

About This Course

In this five-day course, you learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform, endpoint management solution with VMware Workspace ONE® UEM. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint life cycle. After the course, you will have the foundational knowledge for effectively implementing Workspace ONE UEM. Also, you learn how to apply the fundamental techniques for integrating VMware Workspace ONE® Access' with Workspace ONE UEM to securely distribute business-critical applications from any device and to configure access management controls. Through a combination of hands-on labs, simulations, and interactive lectures, you configure Workspace ONE Access and Workspace ONE UEM system and productivity integrations. You will leave with a foundational understanding of how Workspace ONE uses various authentication methods and protocols to determine user access permissions and enable single sign-on. Overall, the course lays out the foundational principles of identity and access management. Please note - This course is a combination of the VMware Workspace ONE: Skills for UEM and the VMware Workspace ONE: Integrations course.

Who Should Attend

Workspace ONE UEM and Workspace ONE Access operators and administrators, account managers, solutions architects, solutions engineers, sales engineers, and consultants

Learning Outcomes

Upon successful completion of this course, participants will be able to:

By the end of the course, you should be able to meet the following objectives:

Explain and apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform endpoint management solution with Workspace ONE UEM

Outline the components of Workspace ONE UEM

Explain the general features and functionality enabled with Workspace ONE UEM

Summarize the basic Workspace ONE administrative functions

Explain and deploy common Workspace ONE integrations

Securely deploy configurations to Workspace ONE UEM managed devices

Onboard device endpoints into Workspace ONE UEM

Summarize the alternative management methodologies for rugged devices

Discuss strategies to maintain environment and device fleet health

Configure and deploy applications to Workspace ONE UEM managed devices

Analyze a Workspace ONE UEM deployment

Enable email access on devices

Integrate Workspace ONE UEM with content repositories and corporate file shares

Explain the general features and functionalities that Workspace ONE Access enables

Demonstrate how to integrate Workspace ONE UEM with Workspace ONE Access

Summarize and implement Workspace ONE productivity services into the digital workspace environment

Explain the methods of enabling mobile single sign-on for mobile endpoints managed in the digital workspace

Configure Workspace ONE Access to support SAML 2.0 for federated authentication across the workforce

Additional Course Details

Nexus Humans VMware Workspace ONE: Deploy and Manage [V22.x] training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the VMware Workspace ONE: Deploy and Manage [V22.x] course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.
